Tasklist - Maker checker feature

The Tasklist feature facilitates the maker checker functionality for the regular transactions pertaining to member accounts.
General flow involves, the clerk having the basic entry and view permissions would fill in the details required for any transaction and submit. Which creates a Task which needs to be approved by the designated authority provided he is assigned the necessary permissions.

Entry by Clerk - Verification and Approval by Checker

Designated CBS users should be able to see the **Tasklist** button on the extreme right side of the Header just beside to welcome User space.

Membership

Membership module enables the SmartCBS users to perform the new member admissions, search membership, member kyc, member settlement.

Main navigation - Home->Deposits->Membership
This navigation helps the user to explore all the menu options available in the membership module.

- New member admission

Process outline -

1. the user clerk will fill in the details and save the details.
2. Task is created and assigned to user(s) having the member approve permissions.
3. The approver will approve or reject the membership task from the tasklist.
4. Upon approval a new membership will be created with the entered details.
5. Member account summary page may be used to verify and confirm the newly created membership.

The user shall enter all the mandatory fields information to be able to create a membership. The fields and form is simple and self explanatory.
The same page is also useful for modifying the member related fields as and when required.

The member status can also be changed to in-active from active status. Simple rejoin functionality like modifying the member status from inactive to active can be done through this page.

- Member settlement
  - Case Opening

The process begins with opening a case.

LID – Letter Inward

Main Navigation - Misc And Others -> LID

○ LID Creation / Entry

Sub Menu Option - LID creation

Following are the required fields to create an LID.

1. Section - Drop down restricted values
2. Member Id / Staff No - this field has search functionality.
3. Name – populated upon active member search , for non existing members it should be entered by the user.
4. Unit/Station - populated upon active member search, for non existing members it should be entered by the user.
5. Inward Type - It's a suggestion field, restricted list of values.
6. Inward Description - It is a descriptive version of the inward type.
7. Date - By default current date, however it can be modified to backdate.
8. User remarks - optional field, the user may enter any remarks that user has provided along with LID/letter.

Formatted: Font colour: Custom Color(RGB(34,34,34))

Picture - LID Creation

LID Letter inward creation - backdate provision

Sub Menu Option - LID Modify
Date field is backdate enabled, when the user is required to create LID on backdate he/she should use the Date picker to choose the appropriate date from the calendar. Rest everything is the same as LID creation.

LID Search

Sub Menu Option - LID Search

Picture - LID Search

Letter inward Update

Sub Menu Option - LID Modify
After LID is created, users may change the values for any of the LID fields by opening the same from the following pages:
LID Search - Search using Section / Date / Staff no
LID Modify - Search using LID #
Just make the changes and click on the update button. The changes would be immediately affected.

- ## Letter inward - action taken provision

  This is accomplished via LID Modify. The respective LID owner shall open the LID. (Please ref LID Search section) and mark the action taken and optionally enter action taken remarks and click on update button.

- ## Letter inward - Assigning to the CCS sections for some categories of LID's

  Currently all the created LID's are assigned to the sections chosen by the user who creates LID's.
  Under the sections, we can create as many sections as we want.
  To accomplish the assignment of settlement cases based on the unit name, it could be achieved by manually choosing the right section. We can have SS1, SS2 sections and guide the users to choose the section appropriately.

- ## LID information - based on staff no

  Sub Menu Option - LID Search
  Enter the value in staff no field and click on search to see the LID's created for that member.

- ## Report Section wise LID's between dates

  Sub Menu Option - LID Search
  Choose the desired section and fromDate, toDate values and click on the search button.

Picture - LID Search

- Report - LID's which are due for action between dates

Sub Menu Option - LID Search
Choose the desired value for action taken(0) and fromDate, toDate values and click on the search button.

Picture - LID Search

- Reports - Action Taken LID's between dates

Sub Menu Option - LID Search
Choose the desired value for action taken(1) and fromDate, toDate values and click on the search button.

Picture - LID Search

- LID print

Sub Menu Option - LID Search

Search for desired LID's using any of the search options available. And click on the button Print to get the LID's information extracted into a PDF. a PDF report is generated and opened in a new browser tab when the data is available for the given search options. To download into the computer, Please use the download option available on the browser tab.

Membership closures as per COBOL - Workaround

Main Navigation -

Note: This activity is needed until the settlement feature is fully functional in the CBS and entered from time to time by the CCS team in the CBS.
This is taken care off in the process of the Bulk Upload using excel page.

Recovery

Main Navigation - Recovery

Recovery Process

Sub Menu Option - Recovery Process

Picture Recovery Process main page

Process Flow

1. Upload Salary File
2. Defaulter to Regular
3. Remove Surety Flags
4. Unit Wise DRAFT - Generate draft
5. Download and verify the Draft
6. Unit Wise Process
7. Verify Unit Recovery
    a. Unit Recovery - Head wise
    b. Unit Recovery - Member wise

Process Flow Explained

Upload Salary File - Navigation: Misc & Others->Bulk upload using Excel

a. This step will keep the CBS updated with the latest salary info of every member which includes, total ccs deduction, MRDF and other salary break-up params.
b. After this step, CBS can extract the members who have become regular from default status.
c. This step would enable the CBS to remove the surety attachments for those member loan accounts who have become regular members from default status.

Defaulter To Regular

is an action button on the recovery process page, which will enable the CBS user to download a report containing members info who have become regular based on inputs Place of Work and Month.

Remove Surety Flag

Is an action button on the recovery process page, this action shall always be after the step-2 verification. This action will remove the prevailing surety attachments of the members who have become regular this month. Inputs required to perform this action are Place of Work and Month. This step cannot be rolled back. Post this action, Step-2 can not generate a report of the members who have become regular members.

DRAFT

This action button is enabled with the *Running Process Status Tracker* feature. Fill in the required information Place of Work, Month, Recovery Amount and click on the action button. It will generate the draft for the chosen unit and make the draft available for report download(-->action button Unit recovery - Draft) After seeing the complete status in the Running Process Status Tracker, Report shall be downloaded. Any attempt before the process gets completed, report would be incomplete may not have the full information available)

Unit Recovery Draft

After the step Draft is complete. This action button downloads the Unit recovery - Draft.

Please note that, Any attempt before the draft process gets completed, the report would be incomplete and may not have the full information available.

Process

Required inputs are Place of Work, Month, Recovery Amount, Recovery Head. Click on the action button. This action button is enabled with the Running Process Status Tracker feature. CBS users may track the process status from Running Process Status Tracker. After seeing the complete status in the Running Process Status Tracker, After the process is completed, All the ledgers would be updated with the recovery process results.

Process results may be verified through reports "Unit Recovery - Member Wise" and "Unit Recovery - Head Wise". Any attempt before the process gets completed, report would be incomplete may not have the full information available)

Single Recovery Process

Sub Menu Option - RECOVERY->Single Recovery Process

This page is intended to process the Recovery for a member in special circumstances like member has come for closure, member recovery has received from other than salary recovery.

- Statement for Selected Head will open and the user can check the Head transactions in that report.

Journal Entry

Navigation

Misc and Others - Journal Entry - Search with Alias/Member GL /Staffno

Overview

This feature is intended to facilitate transactions between the member self accounts. I.e between one account of the member with another account of the member. Thus it eases the amount adjustments from the member accounts as and when there is a clarity on the individual ledger balances. The internal adjustment is always performed on the date of the transaction. Back dated transactions are not allowed.

Internal adjustment transactions involve different accounts of the same member, the sum of amount debited from member accounts must be equal to the sum of amount credited to member accounts.

Important notes
